Identifying difference
for better security

Our solutions increase security, improve accountability and reduce costs.

Core is a privately owned software development company based in Belfast, Northern Ireland. Established in 1994, the company is the leader in biometric identification software for custody management. Our innovative biometric solutions play a vital role in maintaining control within the highest security establishments in Europe.

Core was instrumental in developing advanced security management systems during the 'Troubles' in Northern Ireland. The complex and unique history of the local security forces must be set in the context of the civil unrest in Northern Ireland over the past 30 years.

Our specialist knowledge and experience gained during this period has put us at the forefront of the industry for over 12 years. Our work in the custodial market has received considerable recognition both locally and internationally. In 2008 Core established Tusa Inc, a U.S. subsidiary.

With a user base that stretches across Ireland, the United Kingdom, and America the positive effects of the peace process and the Good Friday Agreement continue to be felt by everyone at Core. "Without it, and the new era it created, our products would still be a very well kept secret."

Areas of Expertise

We are expert problem solvers; solving complex problems where others have failed. This success is built on core capabilities and our distinct understanding of the operational challenges faced in custody environments.

Our expertise and experience in working in demanding environments has put us at the forefront of the industry. Our solutions increase security, improve accountability and reduce costs.

Biometrics

Core are Northern Ireland's most experienced biometric identity management experts. We have developed a range of solutions from biometric access control to biometric login to confidential systems using biometric technologies such as Fingerprint, Hand Geometry, and Iris Recognition.

Access Control

Core specialises in providing access control solutions for a range of high security institutions, construction sites and government buildings.

Integrated Security Management

Core's Integrated Security Management system provides a single interface to manage all electronic security and access control devices.

Custody Management

Core excels in delivering secure solutions for custody management. Our systems are designed to facilitate the management of detainees in providing a real-time record of what happens during the detainee's time in custody.

Lock Control

Core have developed a new generation electric locking solution for the custodial market providing superior flexibility, accountability, control and resilience.

Direct to Inmate Communications & Information

Core have a suite of products that provide inmates with direct access to information and services.
